

3.1.1.2. Project Team

On this tab, users can list the project team members. It contains two panes:

- The **Our Team** pane includes the list of your company employees responsible for the project.
- The **Customer Team** pane lists the customer contacts who are responsible for the project.

To add a new member to **Our Team**, click **Add** on the left pane toolbar and select an employee from the **Employees** list. In the **Project Role** column, choose a role this employee will play for the project. You can select a role from the list of **Project Roles** or add a new one.

To add a new member to the **Customer Team**, click **Add** on the right pane toolbar and select a customer contact from the **Company contacts** list of the customer. In the **Project Role** column, select a role for this contact. You can choose from the list of **Project Roles** or create a new role as needed.

This helps in organizing the project teams and ensuring that roles are assigned to both internal and customer team members.
