

3.1.1.8. Projects Payment Stages

The **Projects Payment Stages** tab is used to **plan, organize, and track project payments** based on progress.

Each payment stage corresponds to a project deliverable, a progress checkpoint, or a scheduled milestone.

The columns shown:

- **#** - Sequence number.
- **Stage**- Name or description of the payment stage (e.g., "Advance Payment", "Completion of Phase 1", etc.).

This **Project Payment Stages** window allows selecting predefined payment stages, such as:

1. Advance 10%
2. Design Finish
3. FF finished (probably Final Finish)
4. GF finished (Ground Floor finished)
5. Interior Finish

- The **Planned Date** (expected payment date) and **Amount** (linked payment amount) can then be manually entered.
