

3.2.1.4. Estimation Templates

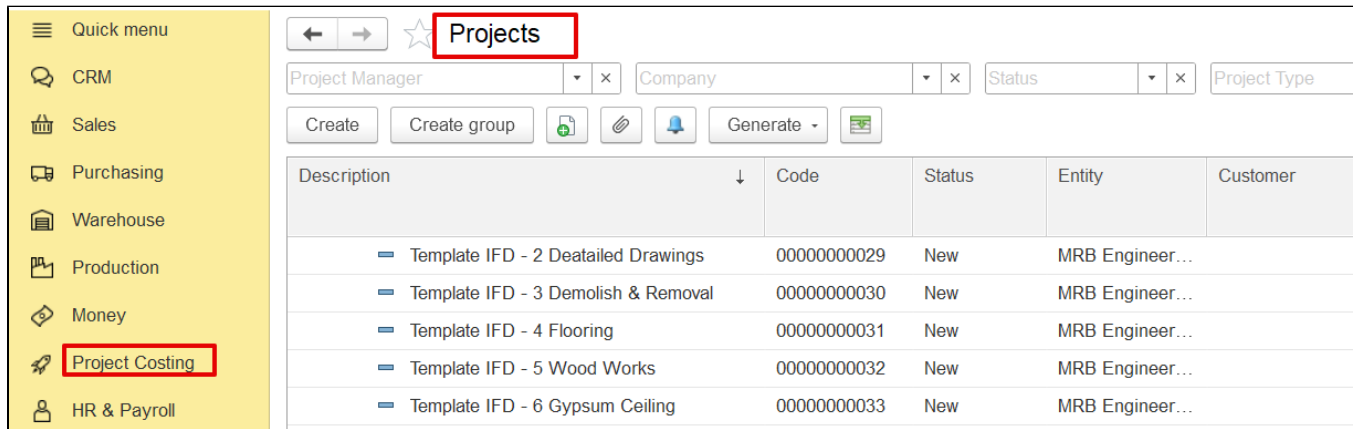

Project templates are ready-made templates that simplify creating new project estimates. They ensure consistency and save time by reusing standard formats and structures.

Each template contains predefined:

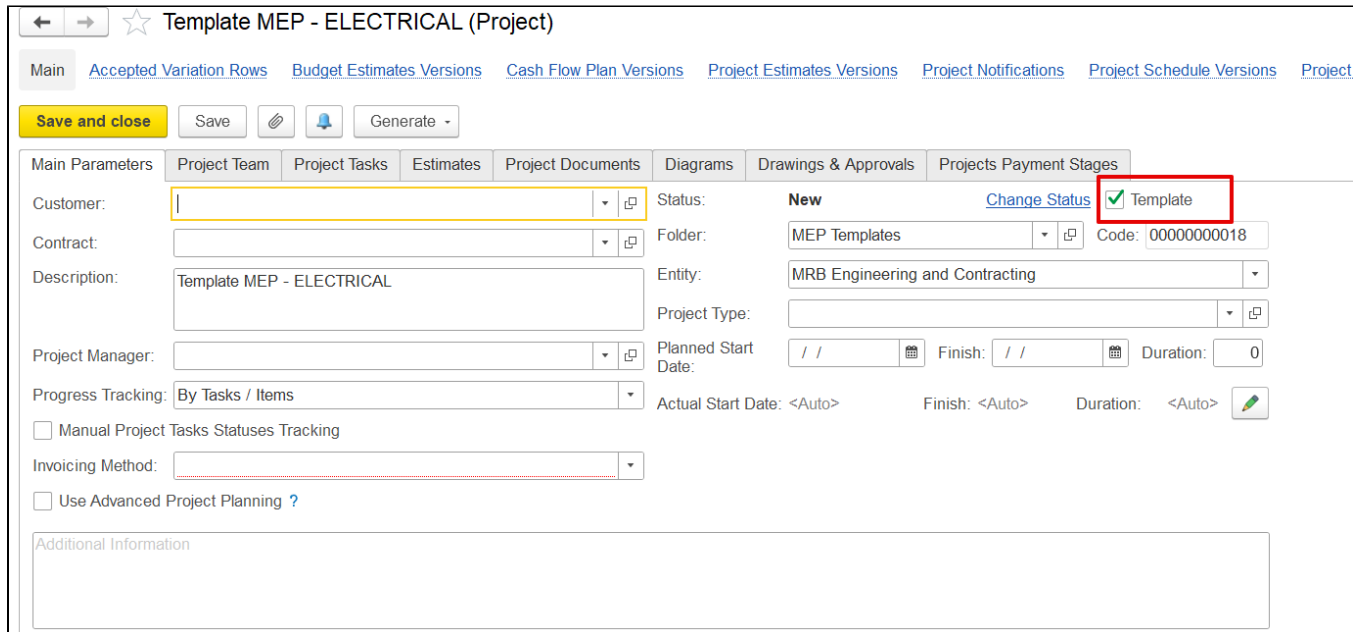

- WBS (Work Breakdown Structure) or hierarchy
- Cost and revenue structures
- Standard tasks, UOMs, and pricing
- Overheads and markup percentages (if applicable)

1. How to Create a Project Template

- Go to the **Projects Module**, navigate to the **Projects** screen from the main menu.

- Click **"Create."** to open a new project entry form.
- **Enter Template Details**
 - **Description:** Name of the template (e.g., "Template MEP – ELECTRICAL").
 - **Status:** Set as "New".
 - **Check 'Is Template':** This marks the project as a reusable template.
 - **Entity, Company, and Project Type:** Fill these as needed for categorization.

- **Build the Estimate Structure**

- Go to the **Estimates** tab.
 - Manually enter cost and revenue items or import BOQ from Excel.
 - Include WBS codes, units, prices, overheads, and markups.
- **Save**
Once the structure is complete, click **Save**. The project is now available as a template.

2. How to Use a Project Template

The **Fill by Template** feature allows the Project Estimate document to be automatically populated using predefined templates. These templates, stored in the database, contain standardized revenue structures that promote consistency and improve efficiency across multiple projects.

Templates are displayed according to the selected cost calculation method. For estimates where the “Cost is calculated based on revenue,” only templates with matching settings will be shown, and the same applies in the case of Independent Calculations of Costs and Revenues.

This functionality is accessible directly within the Project Estimate document.

Click on the **Fill by Template** option to fill in the revenue and cost tab.

The screenshot displays the 'Fill by Templates' window, which is divided into two main sections: 'Templates' and 'Templates Revenue Rows'.

Templates: This section contains a table listing various templates with their respective revenue and cost values.

Code	Description	Revenue	Cost
0000000001	Template CnC - Bill No : 01 - P...	21,324.00, ج.د.	17,770
0000000002	Template CnC - Bill No : 02 - E...	46,254.00, ج.د.	35,580

Comment

You can select a single line, multiple lines, or all lines. To add a line to your project estimate, hover over it and click *Pick*. The selected line will appear in the estimate table below, where quantity and markup can be adjusted. Cost, total cost, and markup amount will be calculated automatically.
