

3.3.1. Project Item Pricing

To access *Project Item Pricing*, go to:

Project Cost Module **Project Management Document** **Project Item Pricing**

Project Costing	Project Costing Documents
HR & Payroll	Project Estimates
Asset Management	Project Costs Allocations
Accounting	Phased Revenue Recognitions
Taxes	Project Budgets
Analysis	Project Cash Flow Plan
Process Management	Project Statements of Account
Administration	Project Management Documents
Telegram	Project Damages/Losses Report
	Project Item Pricing
	Time Cards
	Project Progress Reports
	Request for Information (RFI)
	Requisitions
	Resource Planning Documents
	Project Scheduling

The *Project Item Pricing* function allows defining price lists for materials, services, fixed assets, and employees, which can then be linked to specific projects.

The interface is organized into five tabs:

1. **Main**
2. **Item Prices**
3. **Fixed Asset Prices**
4. **Position Prices**
5. **Employee Prices**

Main Tab

The **Main** tab is used to define general and essential details:

- **Company:** Select a customer company from the master data. If left blank, the defined prices apply to all companies.
- **Price Type:** Choose the applicable price type.
- **From Date:** Defaults to the current business date but can be changed to set the effective start date.
- **To Date** (optional): Set an end date for the prices.
- **Project:** Mandatory field to assign the prices to a specific project.
- **Document Basis:** Choose the relevant basis document.
- **Comment:** Add any additional notes or remarks related to the pricing.

Comment

Item Prices Tab

This tab defines prices for materials or items. When items are selected as cost elements, these prices are utilized in project estimations and cost calculations.

Example: When creating a project estimate and selecting "Cost of Material" under the cost tab, the item price defined here will be automatically populated.

#	A	Fixed Asset	UOM	Price
1	<input checked="" type="checkbox"/>	Tefal Kettle	hr	50.00

Employee Prices Tab

Allows setting up individual price lists for employees, which are then used in the cost estimation if employees are chosen as cost elements.

The screenshot shows a web application interface for creating project item pricing. At the top, there is a navigation bar with a star icon and the title 'Project Item Pricing (create) *'. Below this are several tabs: 'Main', 'Approvals', 'History of Approval', 'History of Object Status Changes', and 'Taken Decisions'. A toolbar contains buttons for 'Post and close' (highlighted in yellow), 'Save', 'Post', a notification bell, a 'Dr Cr' button, a printer icon, and a 'Settings' button. On the right, there is a 'More actions -' dropdown and a help icon '?'. Below the toolbar, there are four tabs: 'Main', 'Item Prices', 'Fixed Assets Prices', and 'Employees Prices (1)'. Under the 'Employees Prices (1)' tab, there is an 'Add' button, up and down arrow buttons, and a search box labeled 'Search (Ctrl+F)'. A table below displays the pricing data:

#	A	Employee	UOM	Price
1	<input checked="" type="checkbox"/>	Mohammad	hr	150.00

This document simplifies cost estimation. If an estimation is created prior to defining item pricing, the Refill function on the *Project Estimation* document can be used to update prices based on the latest *Project Item Pricing* setup.
