

3.4.1.3. Project Cost Markups

Description

The **Project Cost Markups** report is used to **analyze project costs** and **apply markup percentages** to calculate the final **selling price** or **invoice value** for each task, material, or resource. The data is sourced from the Project Estimates document.

Structure

Generate - Executes the report based on the selected filters or parameters.

Find- Allows users to search within the report for specific text or values.

Collapse/Expand Groups – Show or hide grouped sections in the report.

Print Button- Opens a print preview or directly sends the report to a printer.

Fit to Screen/Zoom Button- Adjusts the report layout to fit within the screen or zooms into specific areas.

Search Button (Magnifying Glass)- An alternate or advanced search tool for locating specific records or entries.

Edit Mode Button- Enables editing mode for the report or screen.

Save disk- Allows formatting or exporting options to be saved to the desk as per required formats, such as to Excel or PDF.

Send- Used to email or forward the report directly to another user or contact.

PROJECT COST MARKUPS						
Project						
Code WBS, Project Task		Quantity	Amount	Markup Amount	%	Amount incl markup
Expense Item						
Item						
Resource						
CONCRETE WORKS			408,242.85	60,674.82	14.862	468,917.67
Overheads			8,004.76	(8,004.76)	(100.000)	
Fuel	1.000		8,004.76	(8,004.76)	(100.000)	
1. Concrete Works			400,238.09	68,679.58	17.160	468,917.67
Cost of Materials			116,904.76	68,679.58	58.748	185,584.34
C50/20 Self Compacted	1,000.000	1,000.000	30,000.00	3,658.00	12.193	33,658.00
< resource isn't specified >		1,000.000	30,000.00	3,658.00	12.193	33,658.00
Grout for Pipe Closing		400.000	38,095.24	(1,818.21)	(4.773)	36,277.03
< resource isn't specified >		400.000	38,095.24	(1,818.21)	(4.773)	36,277.03
Slab on grade including channels, pits for buildings without transformer unit		250.000	25,000.00	48,419.90	193.680	73,419.90
< resource isn't specified >		250.000	25,000.00	48,419.90	193.680	73,419.90
Water tank top slab		500.000	23,809.52	18,419.89	77.364	42,229.41
< resource isn't specified >		500.000	23,809.52	18,419.89	77.364	42,229.41
Depreciation Costs			83,333.33			83,333.33
Property, Plant and Equipment		204.000	83,333.33			83,333.33
ALUMINIUM SCAFFOLDING		200.000	28,571.43			28,571.43
Grader		1.000	20,000.00			20,000.00
Pile Boring Machine		1.000	10,000.00			10,000.00
Stone Crusher Machine		1.000	4,761.90			4,761.90
Trencher		1.000	20,000.00			20,000.00
Labor Costs			96,904.76			96,904.76
Sub Contract			103,095.24			103,095.24

Project – Main project name. Example: Concrete Works

Code WBS / Project Task – Work Breakdown Structure code and phase/task.

Expense Item – Cost categories like Equipment, Labor, Overheads, etc.

Item / Resource – The specific cost item or resource under each category. Resource-level details are displayed only for expenses related to manpower or fixed assets. When these are included in the project estimation, the report will show the specific employee or fixed asset used.

Quantity – Planned quantity (if applicable).

Amount – Original base amount of cost (without markup).

Markup Amount – Profit amount added over base cost.

% – Markup percentage applied to base cost.

Amount incl. markup – Expected revenue amount (Amount + Markup Amount).

Without templates – When checked, it excludes template data, showing only actual project data.

Entity – Selects a specific legal entity or company unit; the report shows data for the chosen entity only.

Project – Filters the report to a selected project's markup data.

Project Task – Filters by specific tasks or sub-tasks within the project; if empty, all tasks are included.

Expense Item – Filters to include only certain expense categories, like labor, materials, or subcontracting.

Item – Shows markup for specific items or resources within the chosen expense category.
