

# Changing Entity's currency

**Problem:** Can the currency be changed in the Entity if it is locked?

The "lock" indicates that there are already existing documents linked to this currency. In this case, the system does not allow changing the currency.

To change the accounting currency, all documents related to this Entity must first be unposted. Once no documents are linked to the Entity, the lock will be cleared and the accounting currency can be changed.

**Thank you for being FirstBIT customer!**
