

No possibility to change the login (email) to another.

Sometimes users working in FirstBit Accounting (1C:Fresh) would like to change their login, which is their email address to a simple one (for E.g. User)

Unfortunately it not possible due to Configuration of FirstBit Accounting (1C:Fresh).

1) Authorization is possible only via email.

2) Recovery is possible only via email.

If entering email address is particularly difficult, we recommend using a Password Manager.
